

THREATENED AND ENDANGERED SPECIES
KNOWN OR LIKELY TO OCCUR
IN
CRAWFORD COUNTY, KANSAS

American Burying Beetle (*Nicrophorus americanus*) - Endangered: May occur in suitable grasslands and upland woodlands. Endangered nationally.

Bald Eagle (*Haliaeetus leucocephalus*) - Threatened: Known to occur as an occasional seasonal transient or winter visitant. *Critical habitat has been designated.* Threatened nationally.

Broadhead Skink (*Eumeces laticeps*) - Threatened: Known to occur in mature woodlands within the Marmaton River basin and may occur in suitable habitat throughout the county. Prefers oak woodlands. *Critical habitat has been designated.*

Common Map Turtle (*Graptemys geographica*) - Threatened: May occur in large streams, lakes, and oxbows having abundant basking sites, slow to moderate current, soft substrate with much aquatic vegetation and tree-lined banks.

Eastern Newt (*Notophthalmus viridescens louisianensis*) - Threatened: May occur in moist bottomland woodlands where small weedy pools are found.

Eastern Spotted Skunk (*Spilogale putorius interrupta*) - Threatened: May occur near woodlands edges in grasslands with shrub clumps or rock outcrops, and in abandoned farmsteads where old buildings or debris piles provide cover.

Eskimo Curlew (*Numenius borealis*) - Endangered: Formerly a regular spring migrant using plowed fields, heavily grazed and burned grasslands. Was most common in the eastern 2/3 of the state, but has not been verified in Kansas since 1902. A few birds may still migrate through the state. Endangered nationally.

Gray Myotis (*Myotis grisescens*) - Endangered: Known to occur in the Spring River basin. Dependent upon storm sewers at Pittsburg. *Critical habitat has been designated.* Endangered nationally.

Green Frog (*Rana clamitans melanota*) - Threatened: May occur in suitable backwater areas near streams and small impoundments.

Least Tern (*Sterna antillarum*) - Endangered: Known to occur as an uncommon seasonal transient or summer visitant. Endangered nationally.

Crawford Co. Threatened & Endangered Species - Page 2

Northern Redbelly Snake (*Storeria occipitomaculata occipitomaculata*) - Threatened: Known to occur in mature upland woodlands having dense leaf litter, rocks, logs, and other debris. *Critical habitat has been designated.*

Northern Spring Peeper (*Pseudacris crucifer*) - Threatened: May occur in suitable habitat. Requires small pools and wetlands with abundant vegetation located near woodlands. *Critical habitat has been designated.*

Peregrine Falcon (*Falco peregrinus*) - Endangered: Known to occur as an uncommon seasonal transient or winter visitant. Prefers areas with large concentrations of waterfowl.

Piping Plover (*Charadrius melodus*) - Threatened: May occur as a rare seasonal transient at sparsely vegetated shorelines of stream, marshes, or impoundments. Threatened nationally.

Snowy Plover (*Charadrius alexandrinus*) - Threatened: Known to occur as an occasional seasonal transient and summer visitant at sparsely vegetated wetlands and impoundment shorelines.

White-faced Ibis (*Plegadis chihi*) - Threatened: Known to occur as an occasional seasonal or summer visitant at wetlands and impoundments.
